

The correct words for this is:

1 match looking to train

2 matches are looking to train

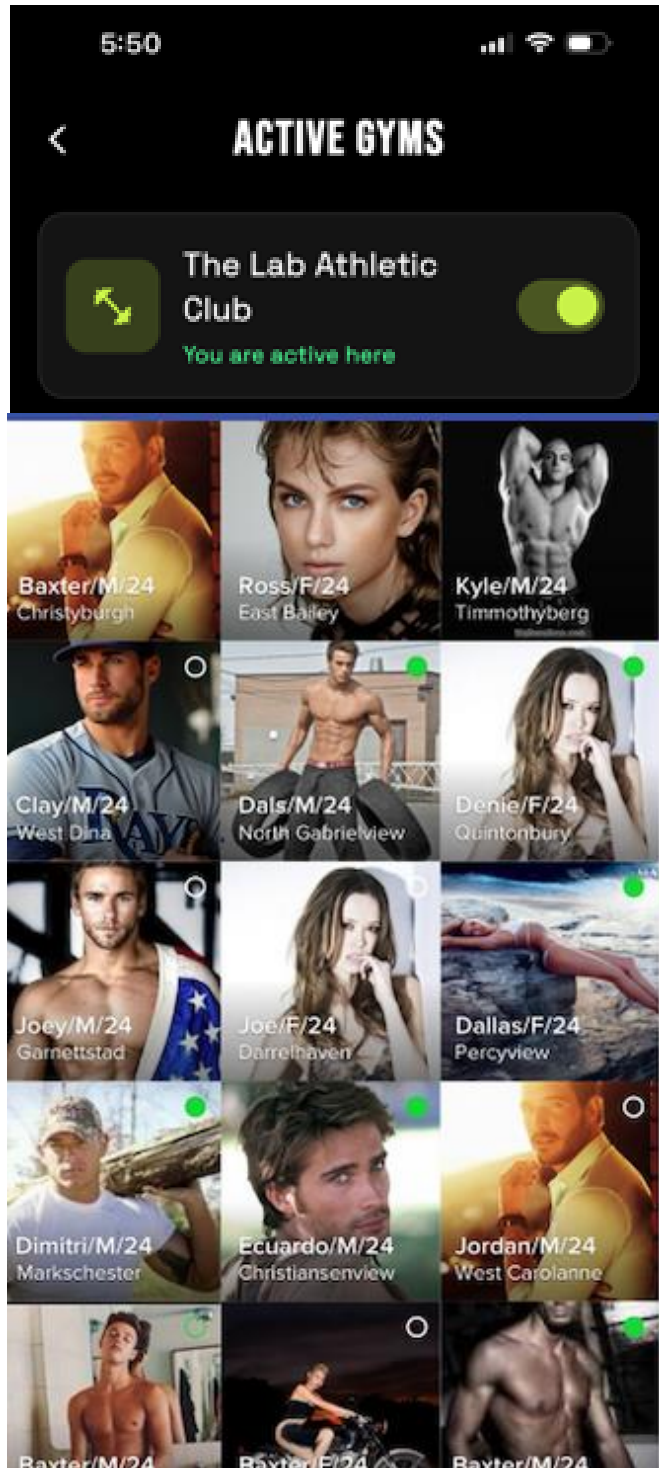

How does someone know who is looking to train? Should there be a way this is accessible by a page of profile avatars with just there profile image once a button is pressed?

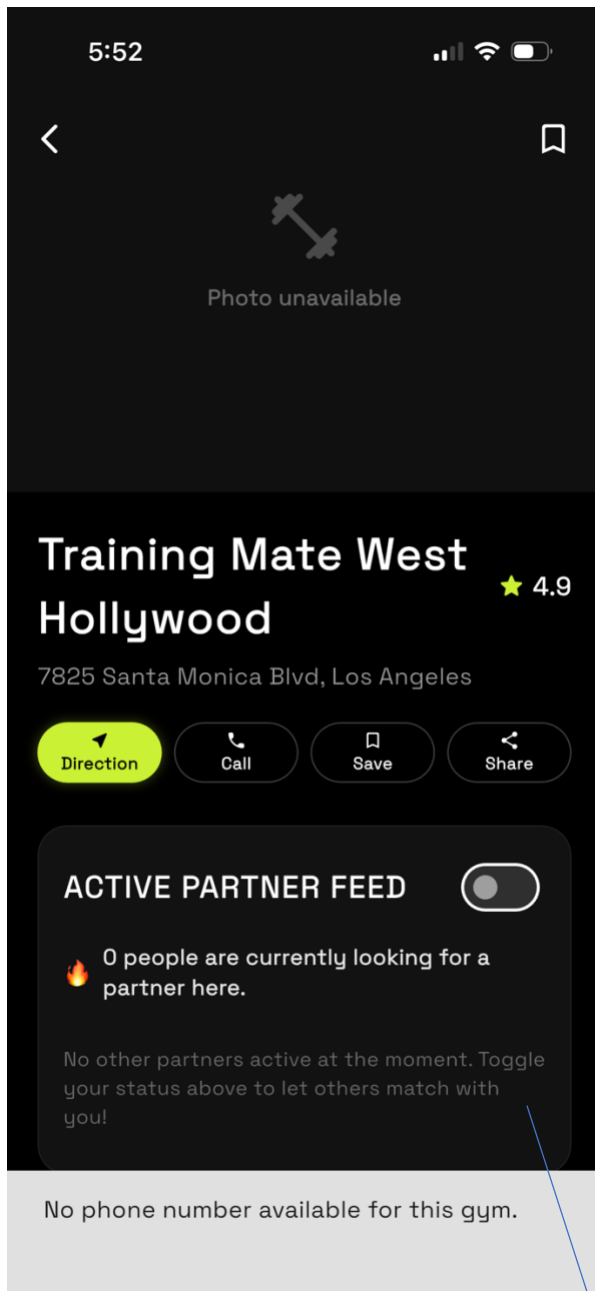

Active Partner Feed is now called “GYMATCH LIVE”

A member should not be able to be LIVE at two different gyms at the same time. Either you are at the Lab looking for a partner or you are at 24Hr Fitness but you can't be at both at the same time.

Change ACTIVE GYMS to GYMATCH LIVE- Lets get that IG vibe popped off by showcasing who is actually live at each gym. This one single act will make people SUPER interested to get to the gym and it helps break the ice because now they know your name. Add a horizontal scrollable row of avatars with a green “Live” indicator.

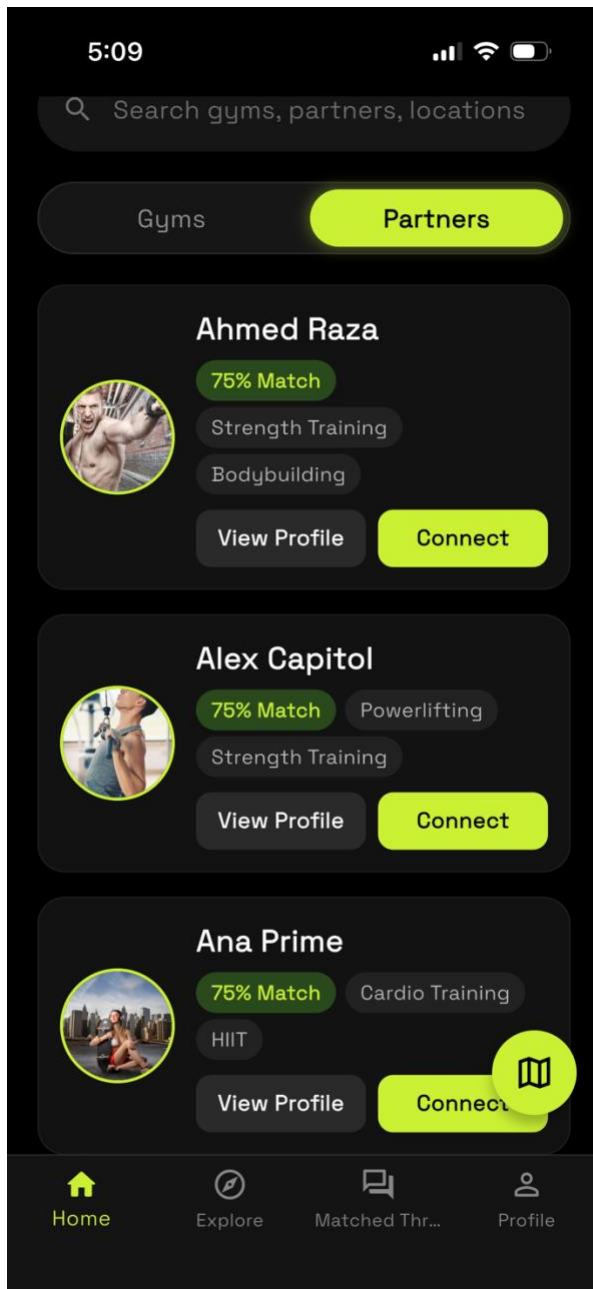

Change text to: No one is live right now. Tap GYMatch Live to let others know you're ready to train.

Change this from 0 people are currently looking for a partner here too:
No matches live right now

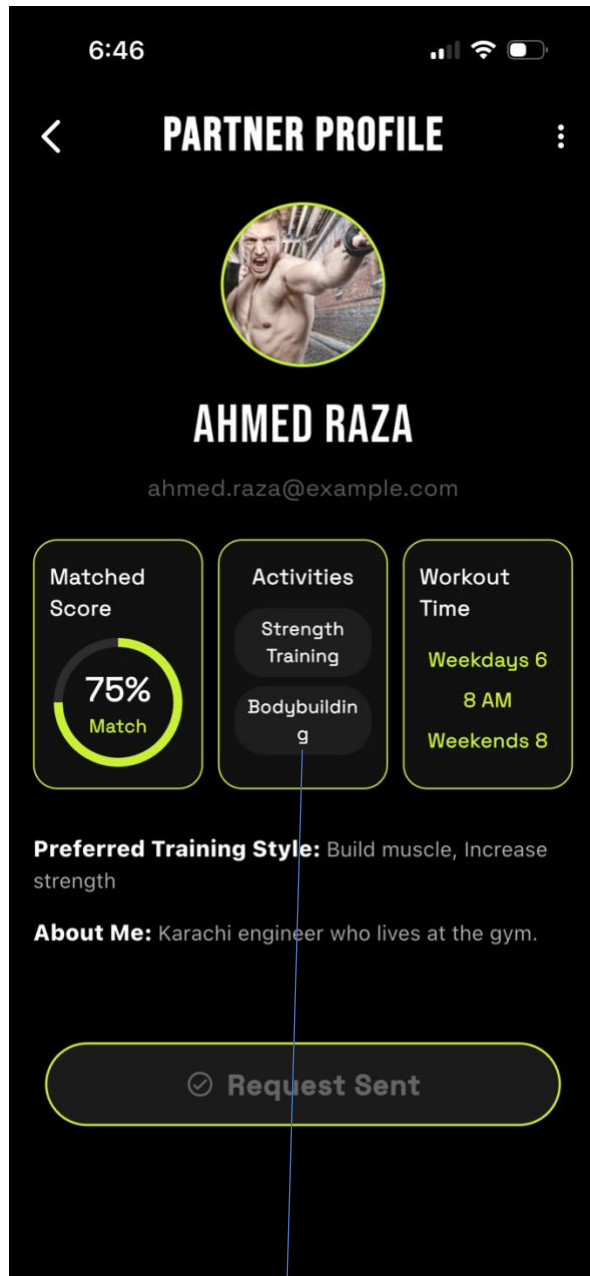

- Phone numbers are missing (can they update it?) or can we retrieve from Google Maps
- Share not working

Suggestion:

Tab 1: Fitness Hubs

Tab 2: My Matches

1. Bodybuilding cannot be broken up like that you may gave to stack Body Building
2. We need to give users five spot option to post images of themselves. This way we can use this as a premium upgrade to ten images in the feature. Plus people want to see who they are trying to get with,.THINK IG!

3. Drop there gallery right below the name and it can be updated in there profile page.
4. Change Partner profile to My Matches

Remove Email from Public Profile

- The email field should be removed from the user-facing profile page entirely.
- It should only appear in the admin panel (our backend dashboard).

Add Travel Slots Below About me

Under the person's name, add two optional travel slots. Each slot contains:

- Dates (e.g., 07/30/26 – 08/07/26)
- City (e.g., Ft. Lauderdale)
- A small green plane icon at the end of the city name.

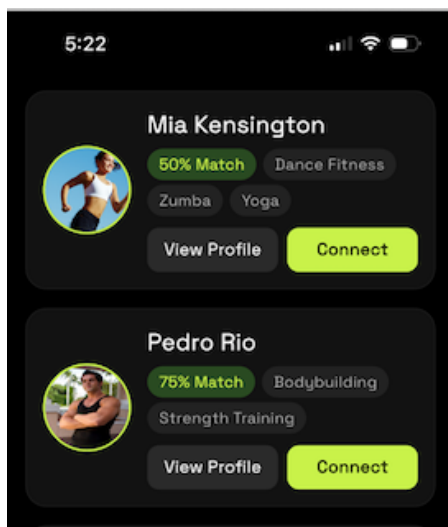

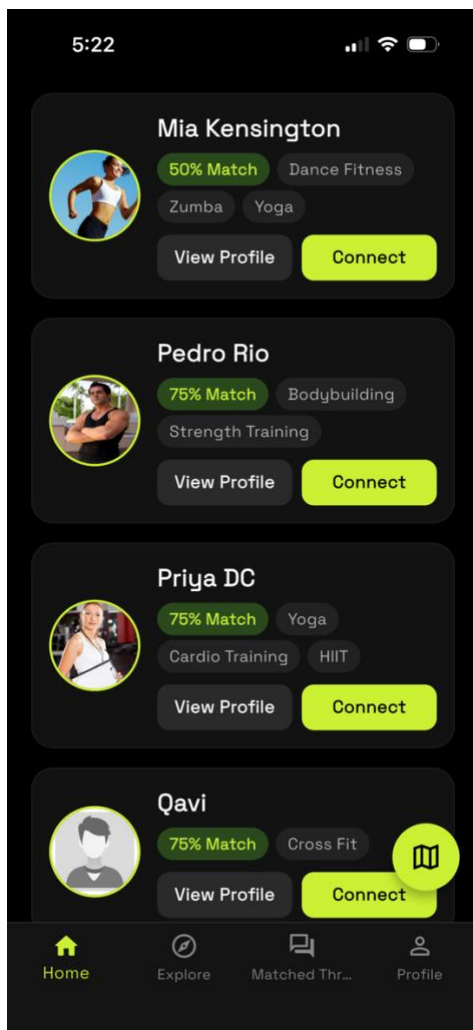

Example layout:

I'm coming to your city

Ahmed Raza
07/30/26 – 08/07/26 Ft. Lauderdale ✈️
09/02/26 – 09/07/26 Miami ✈️
|

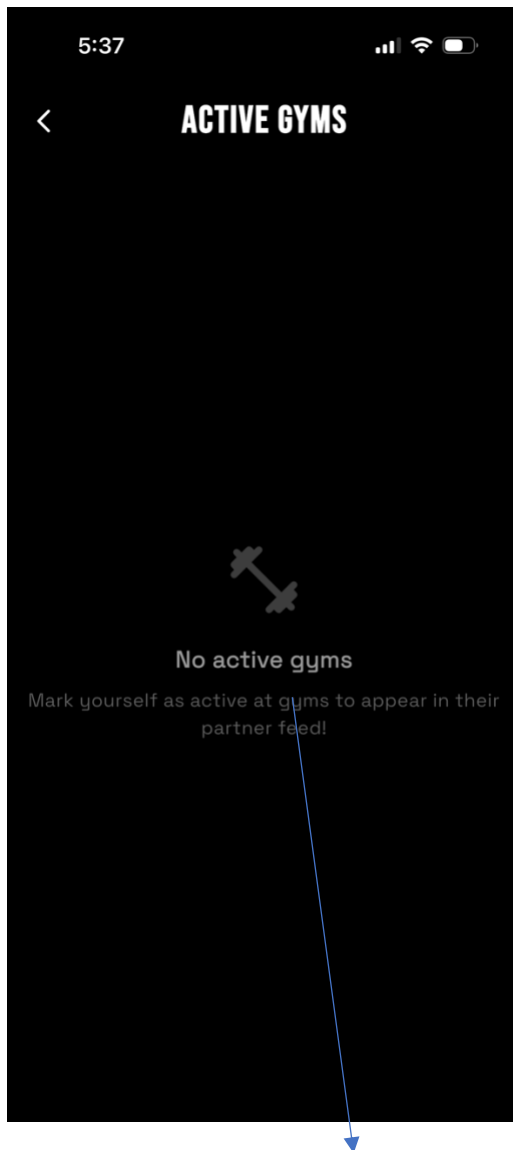

Rules:

- Maximum of two slots per profile.
- The user can add or edit these from their own settings/profile edit screen.
- If no travel slots are set, the section simply doesn't appear.

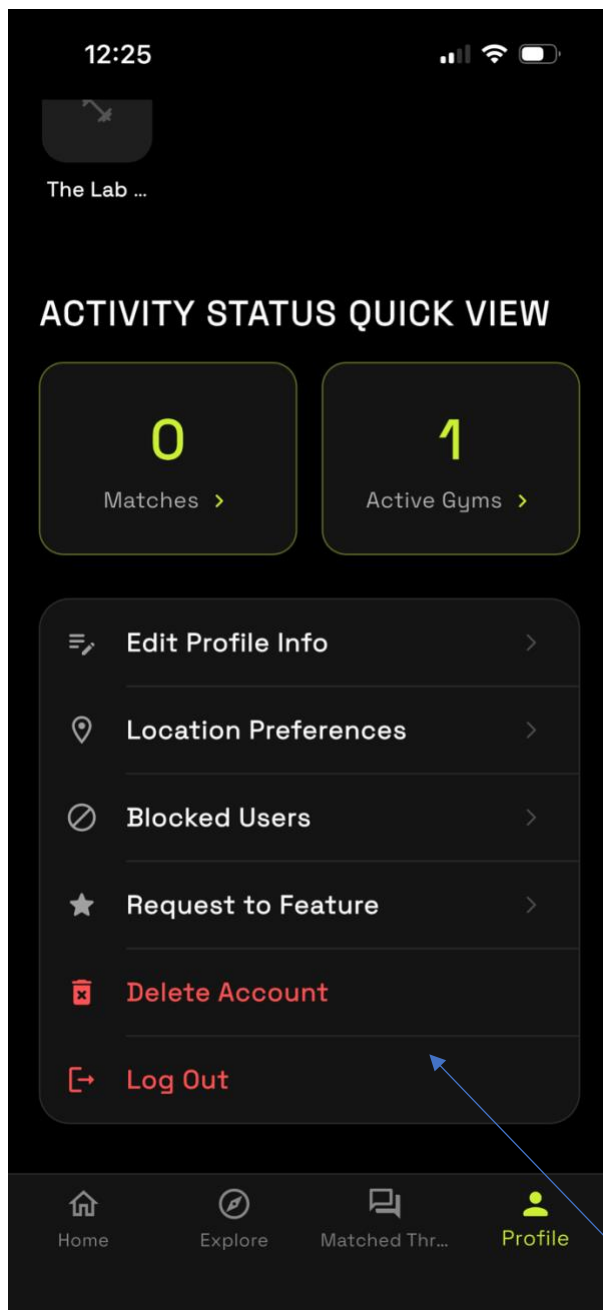

These two people have different names on the website in testimonials. Correct so it's the same names showing for each.

Change ACTIVE GYMS header to FITNESS HUBS

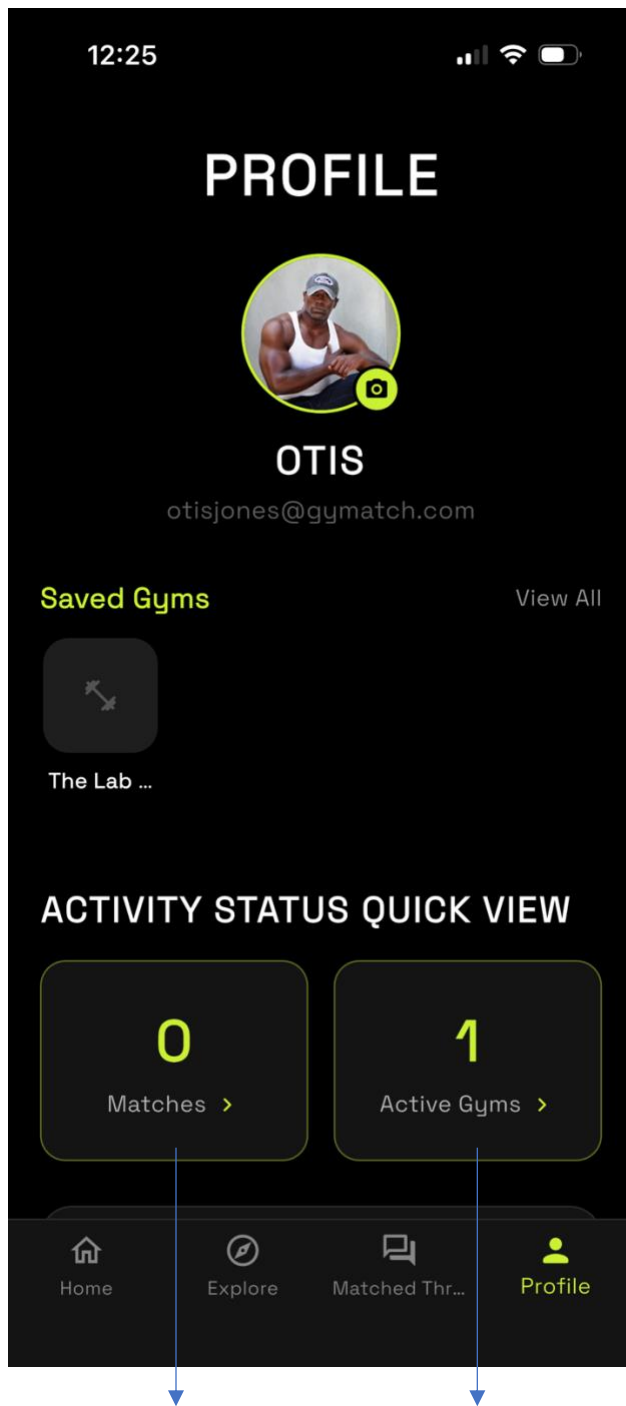

Your next workout starts here.
Explore our Fitness Hubs and send a match request to find workout partners.

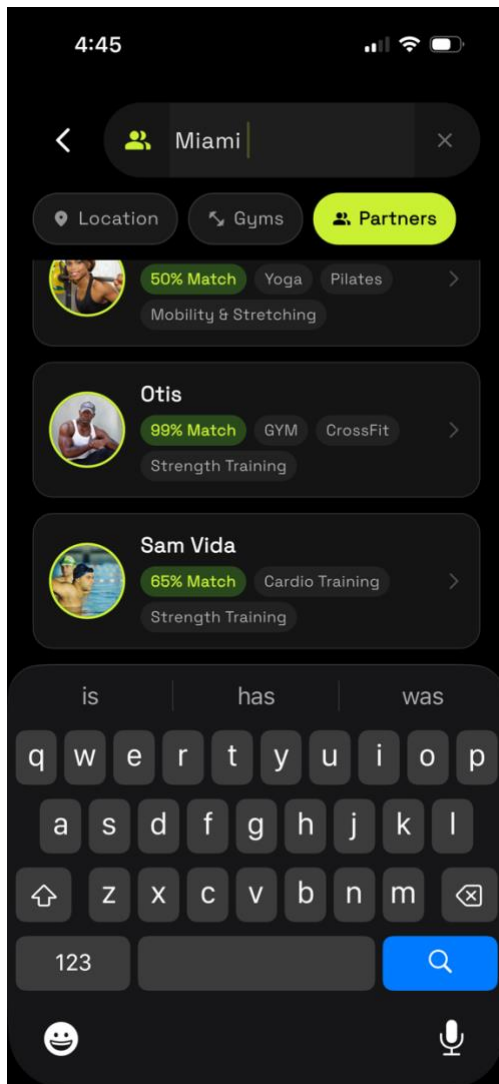

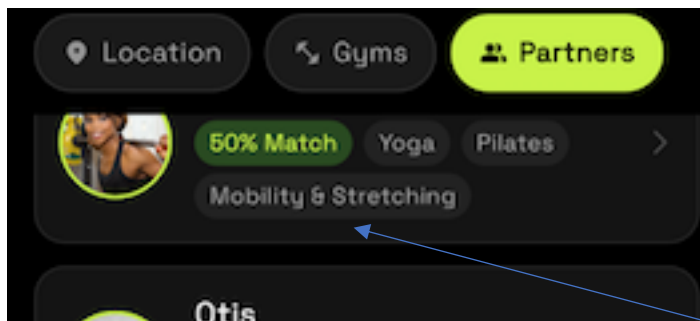

"Your next workout starts here" is clearly about fitness, feels personal, and creates a sense of anticipation. It's more distinctive and on-brand for GYMatch.

Why are we giving away free features? That should be reserved for PREMIUM MEMBERS who have paid to be featured. That's how we make our money and create revenue for this APP. Don't forget to add travel spots which might can replace Request to be featured – can give away our money. That's a second build option when we reach 5,000 subscribers then introduce as a premium tier option.

1. Remove email address under profile image
2. Matches is My Matches and Active Gyms is Fitness Hubs

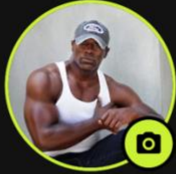

The black girl is on testimonials so make sure name matches

Profile

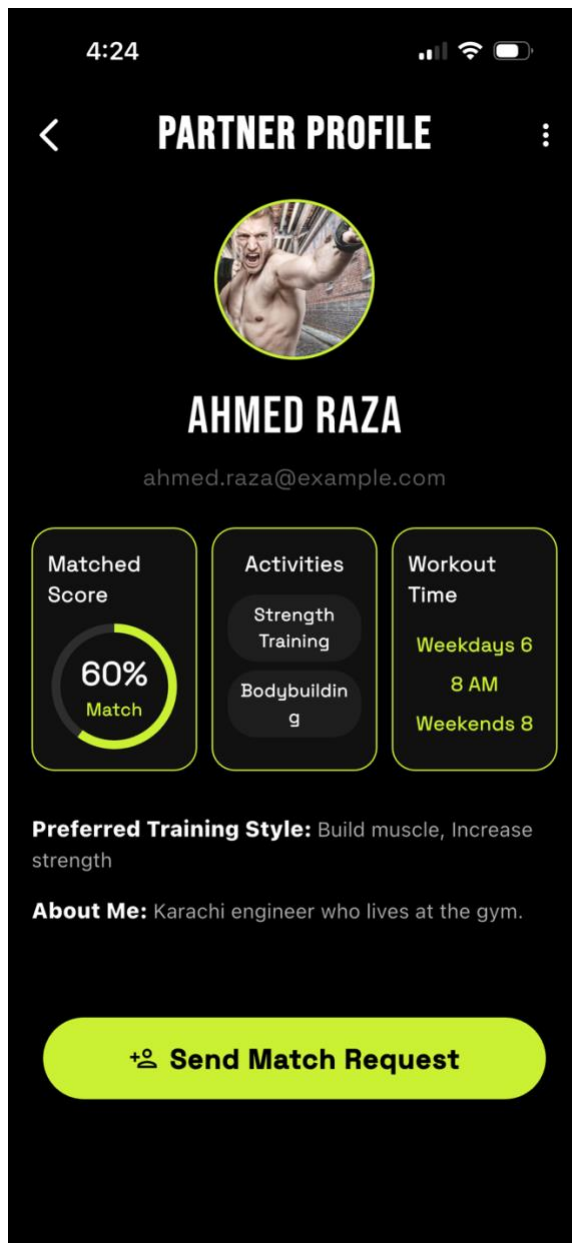

This profile page doesn't state your location like "Beverly Hills, CA" USA so how would another member know where you're from? Its missing "City / State / Country" or "Country / City".. which should then show up on the profile grid for all users.

Saved Gyms should be Saved Hubs

Should we add a link for "Add a Hub"

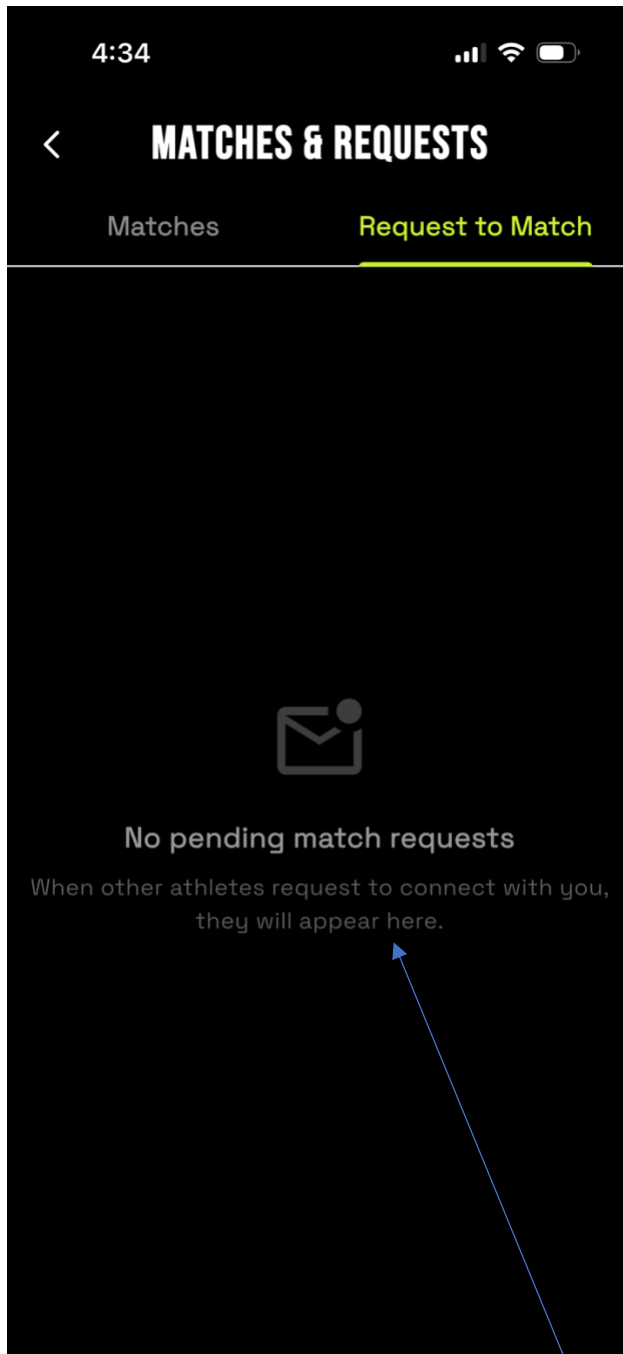

So it would look like → Add a Hub Saved Hubs View All

Workout Time needs to be stacked

Weekdays
6 – 9 AM

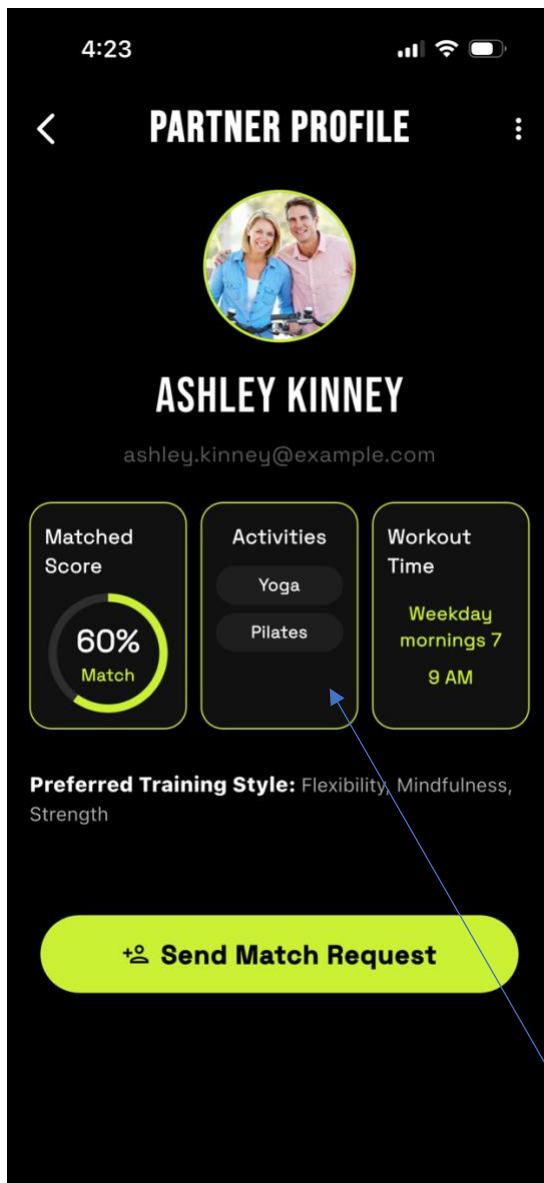

Weekends

Change text:

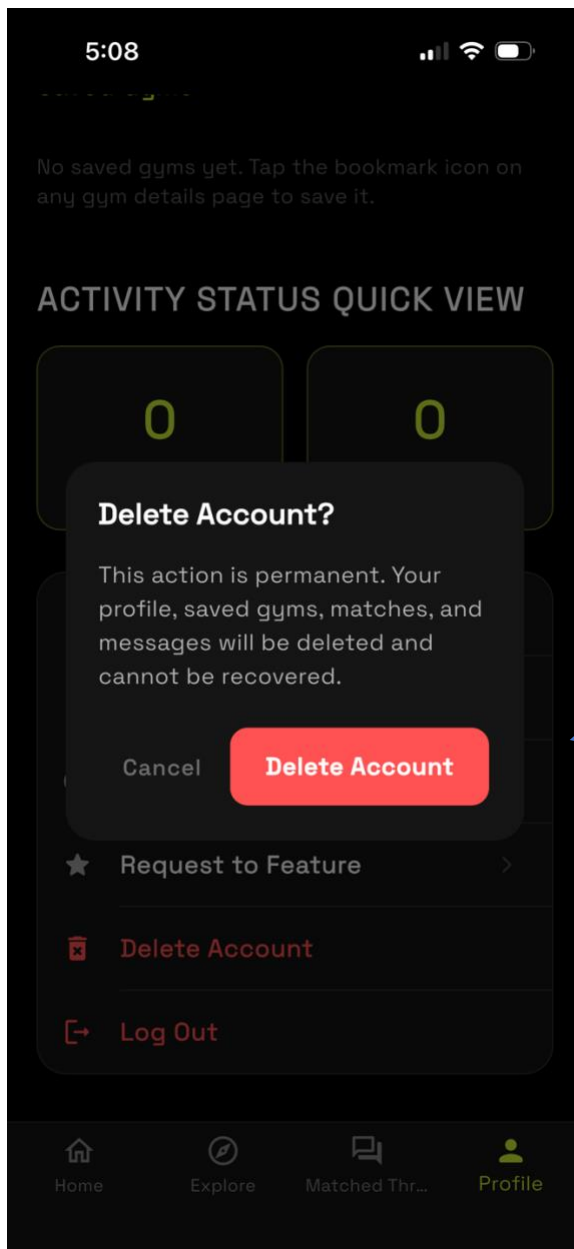

No Pending Match Requests

When a match wants to connect, it'll show up here.

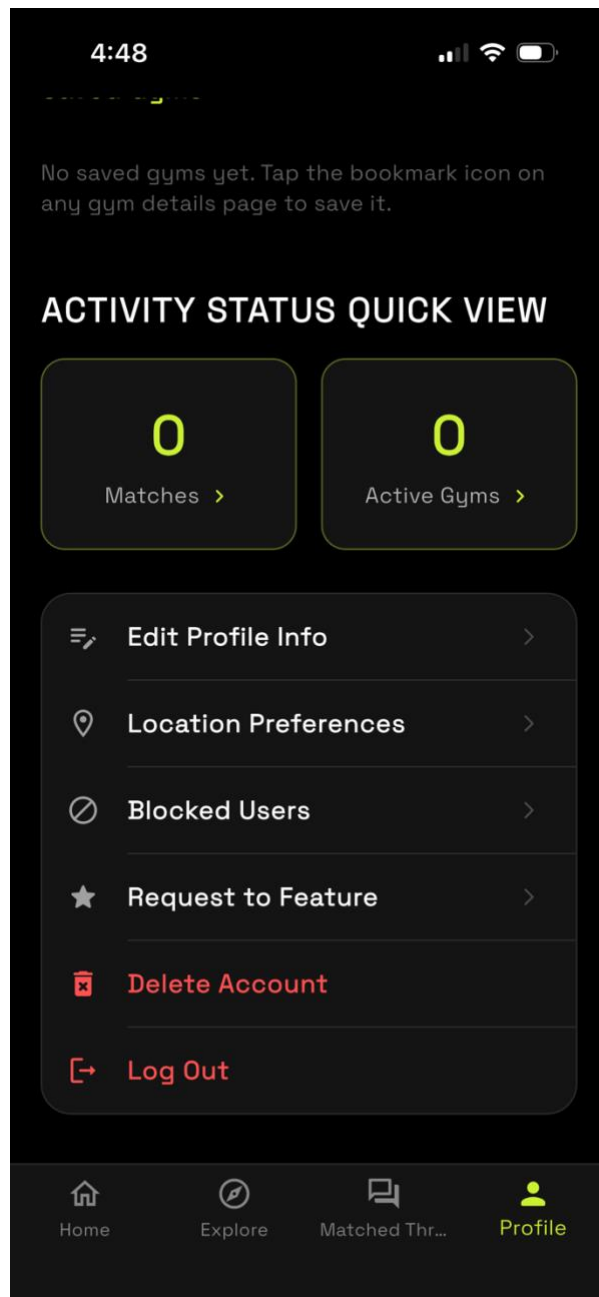

Timing is off – should look like it below

Workout Time
Weekday Mornings
7-9 AM

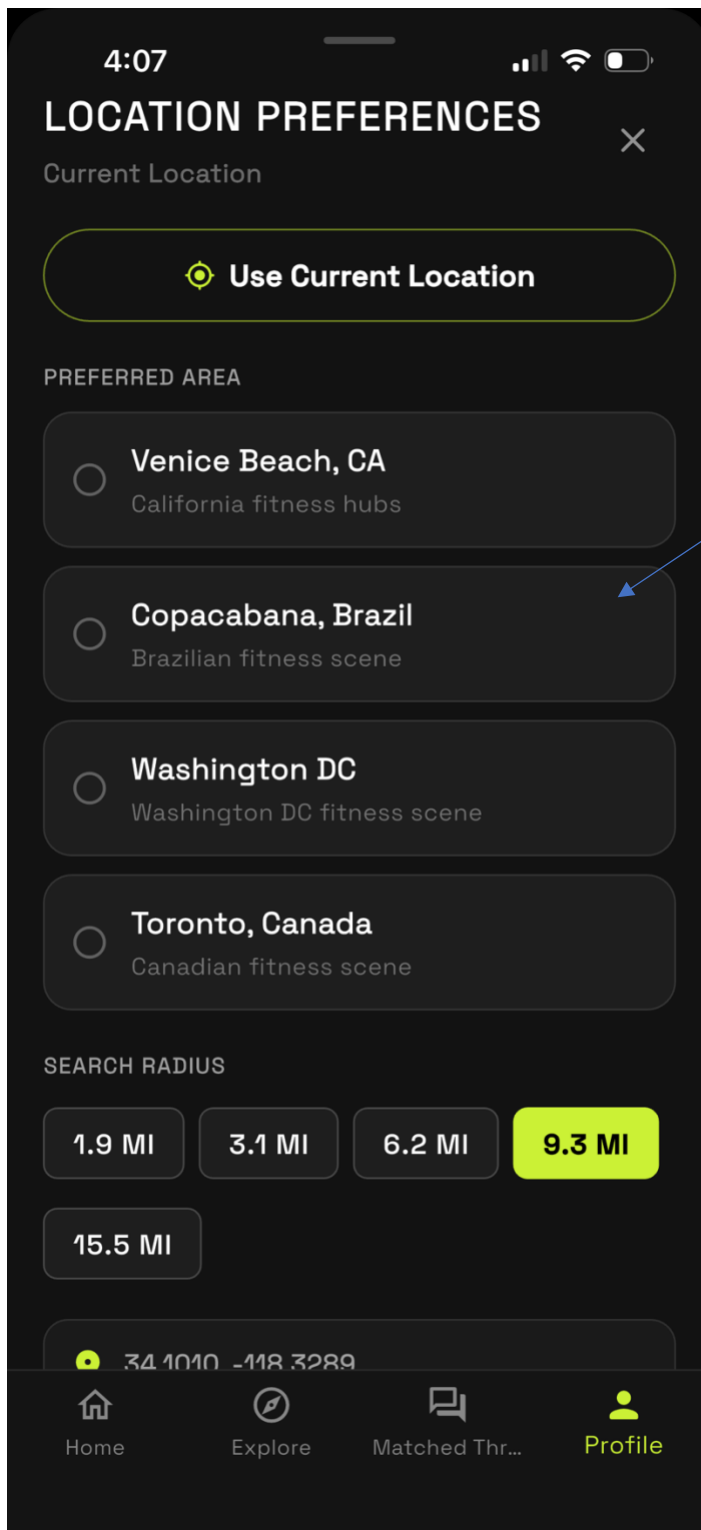

I think we should have a default second follow up.. like. Are you sure? When the Delete Account is selected. Then does it give you reasons you have to select so we can use that info to gauge things? I hit that Delete Account button several times accidentally.

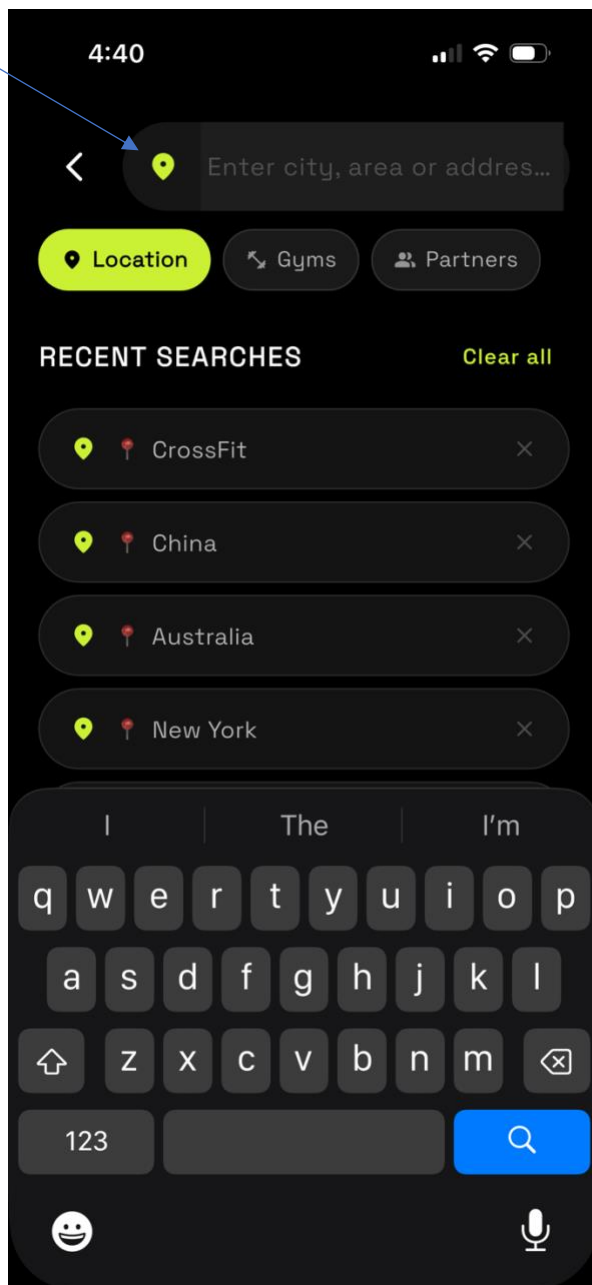

Location Preferences

Not sure what this is – when I click on it I see a list of preferred areas. Where did that come from? How do you change those preferred areas and are they linked to anything?

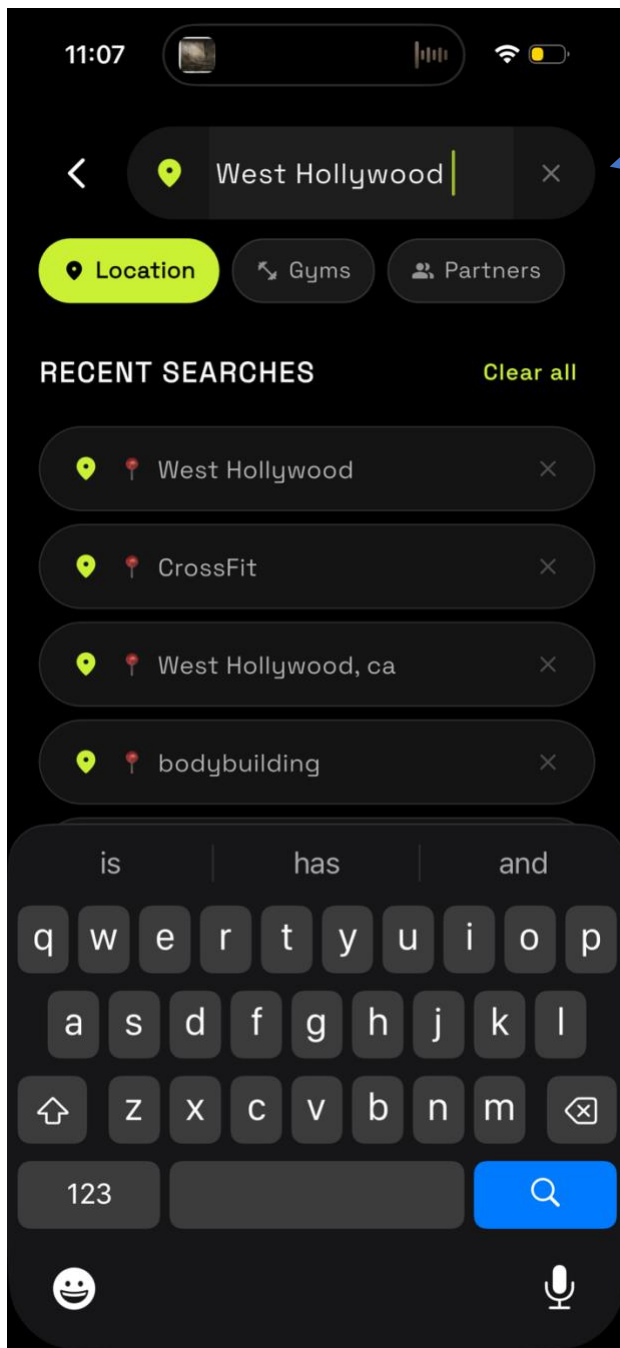

Where did this come from?

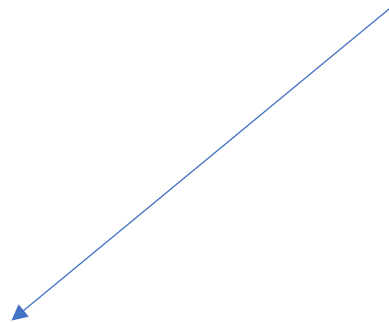

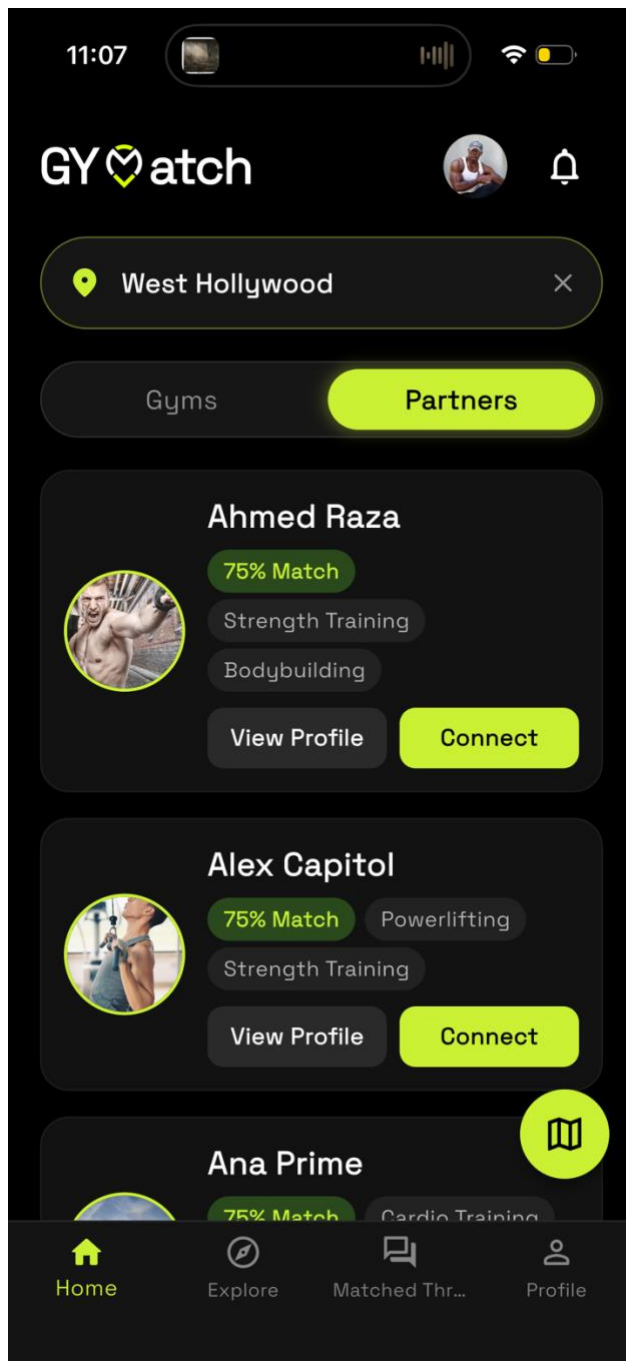

Gyms and Partners at the top need to be Hubs and My Matches
I noticed that Gyms at the top didn't have an icon in the top left search bar but the other two do. Need to say consistent. Also when I tap on Location at the top it just randomly selects users but not based on there location as there city / state/ country doesn't exist on there profile so would it be bake to track a user in Miami if I lived in Cali.

Notice the flow below

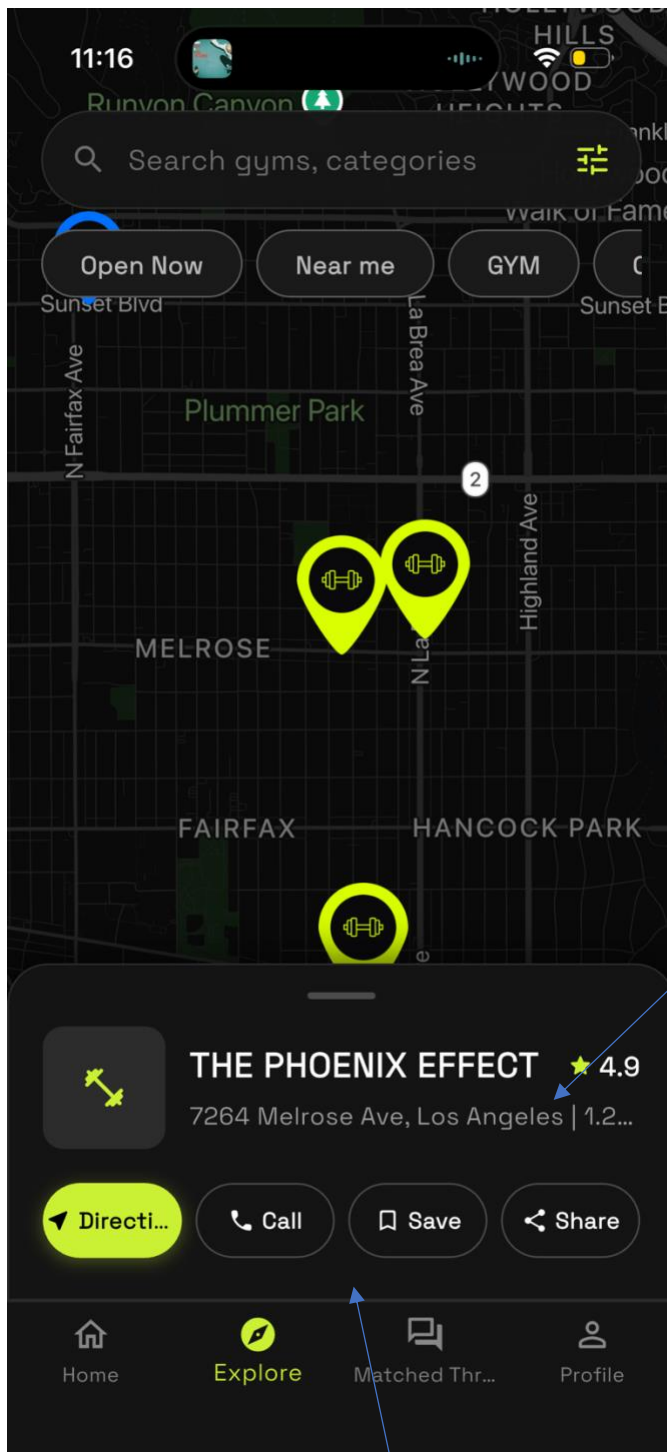

I keyed in west Hollywood in search bar but look at the results below.

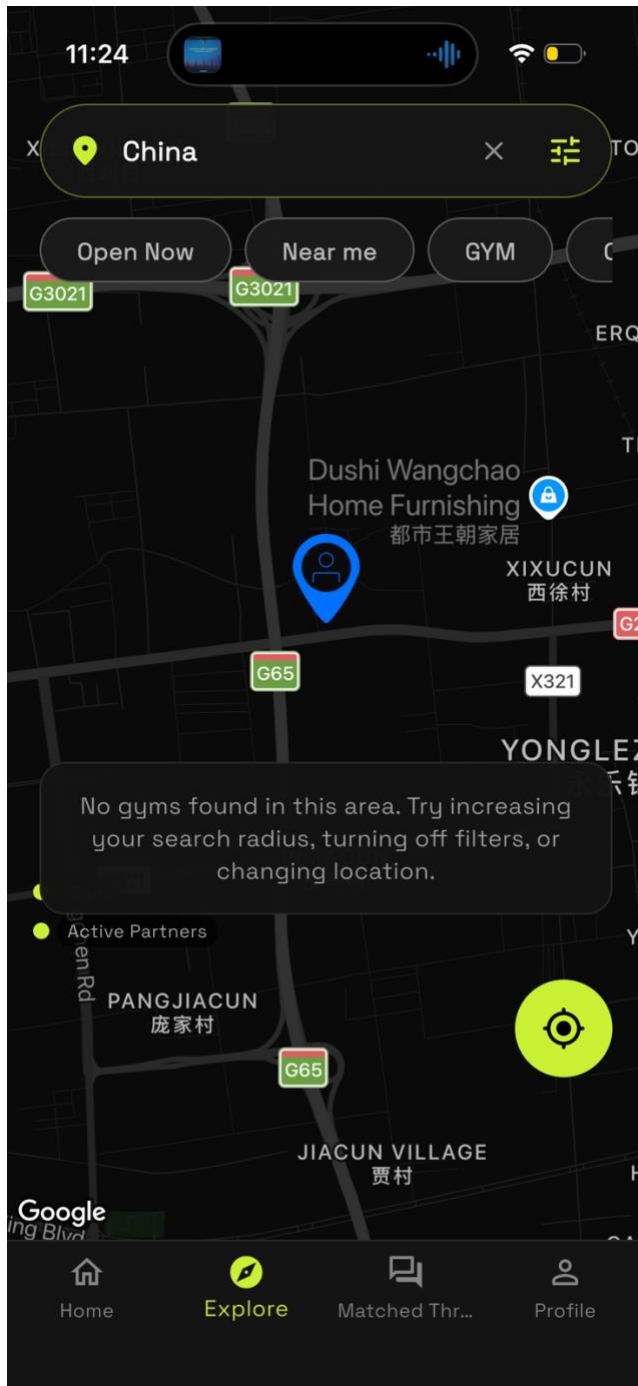

This is are just rand profiles as they don't have an actual location address on their profile that links them to this city.

Filter – when I search for something and then go to its profile. The bottom half of the search wont retract when tapping on it.

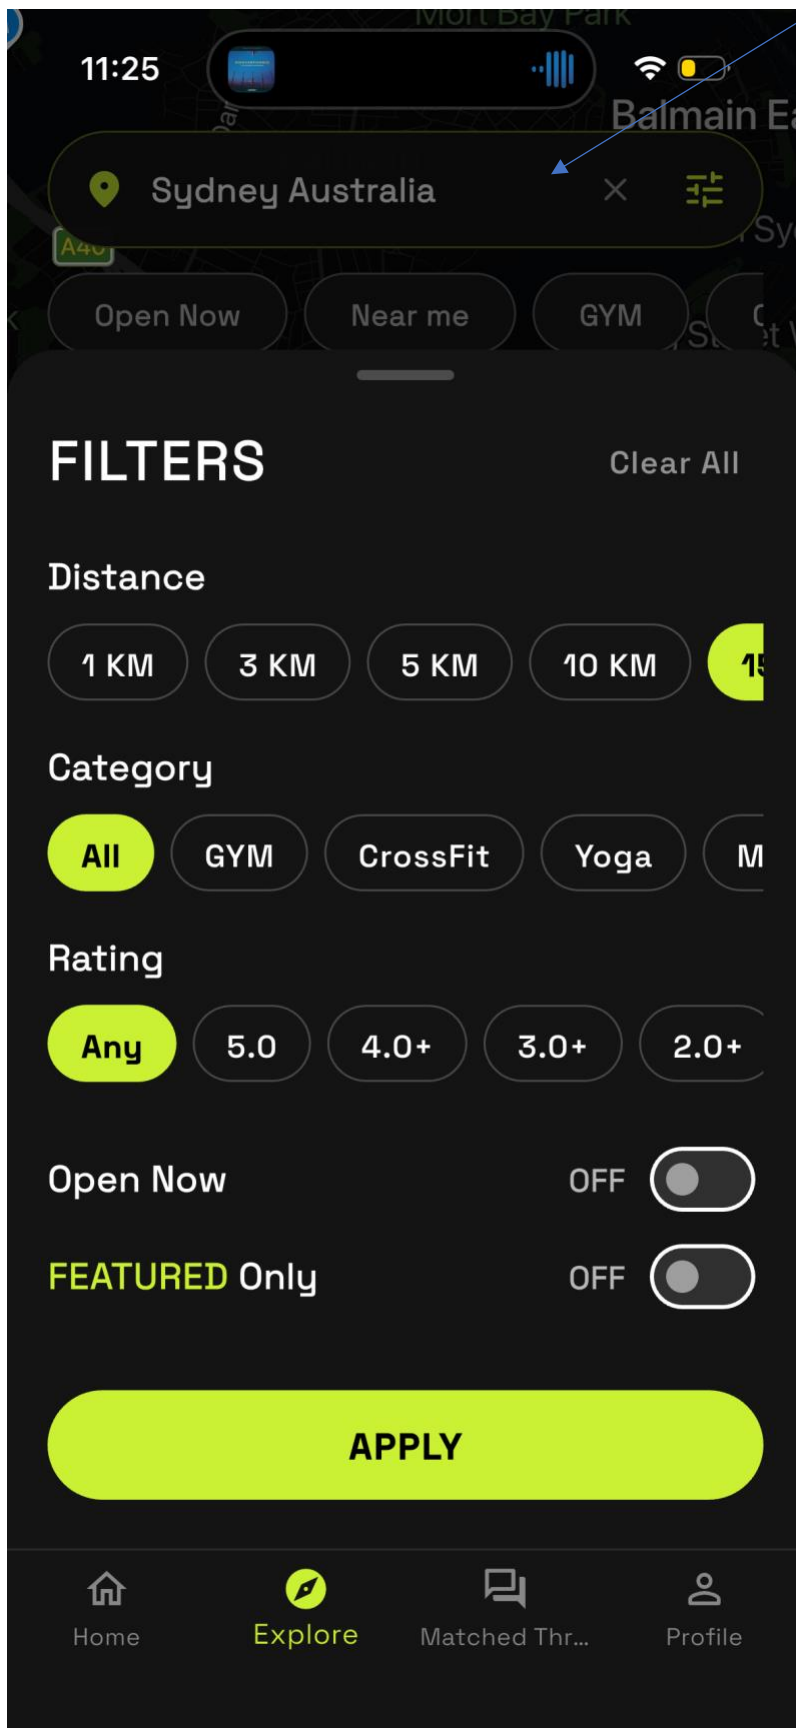

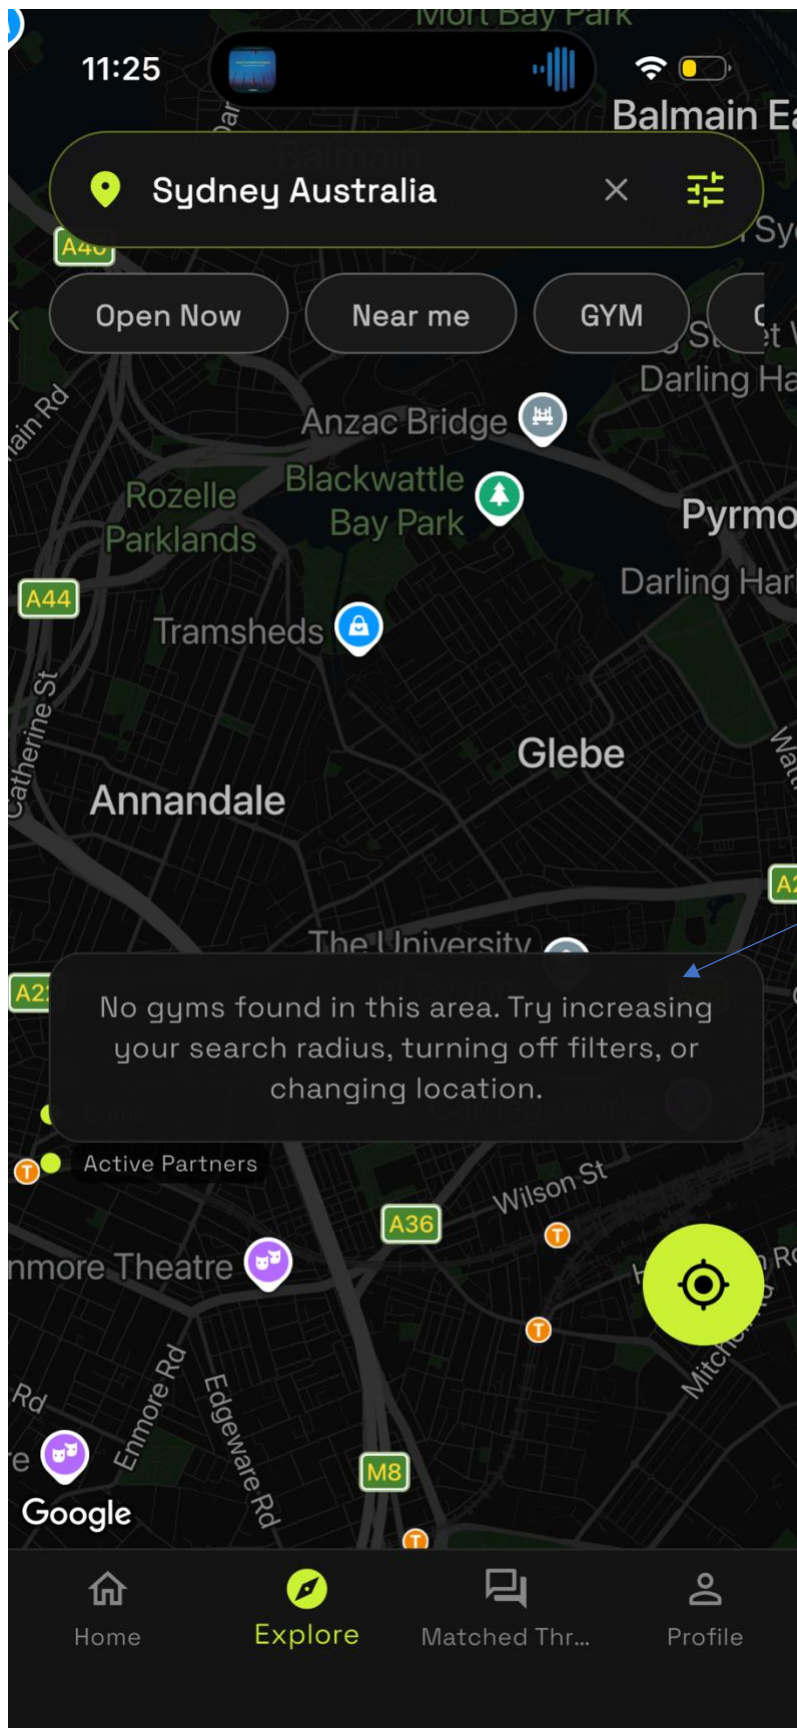

Call and share not working btw 😊 I like the direction button

I think you might be working on this but I want to just notate it anyway. I tried to pull up gyms in other countries and this is what I got btw. I think we spoke about this and so you're incorpotating the new search bar configuration with the city / state / country dropdowns.

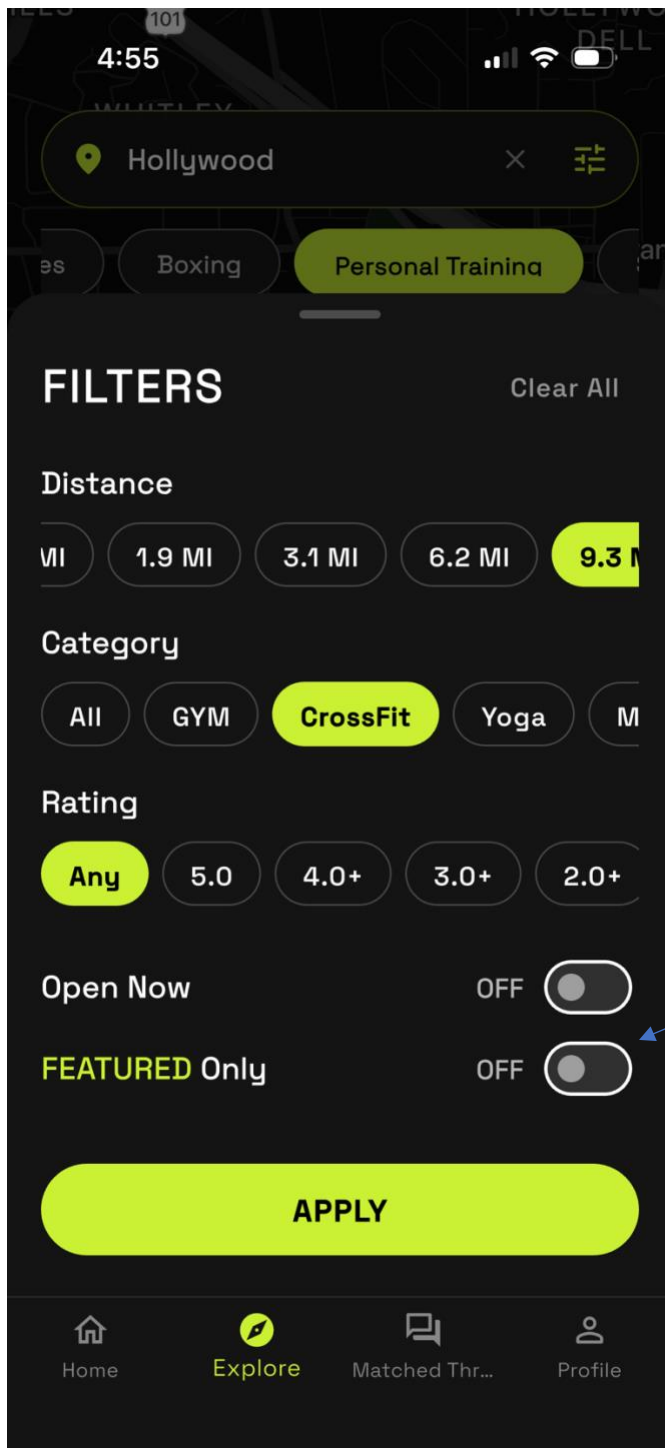

see below. I'm surprised Google maps is not picking up on this.

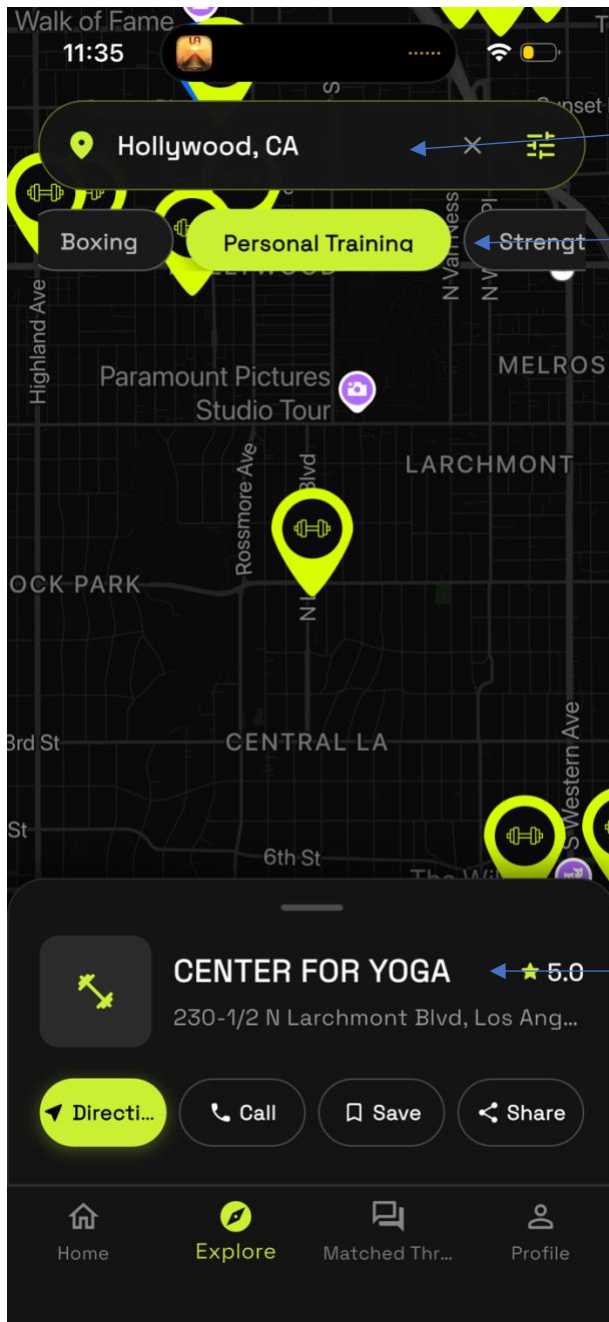

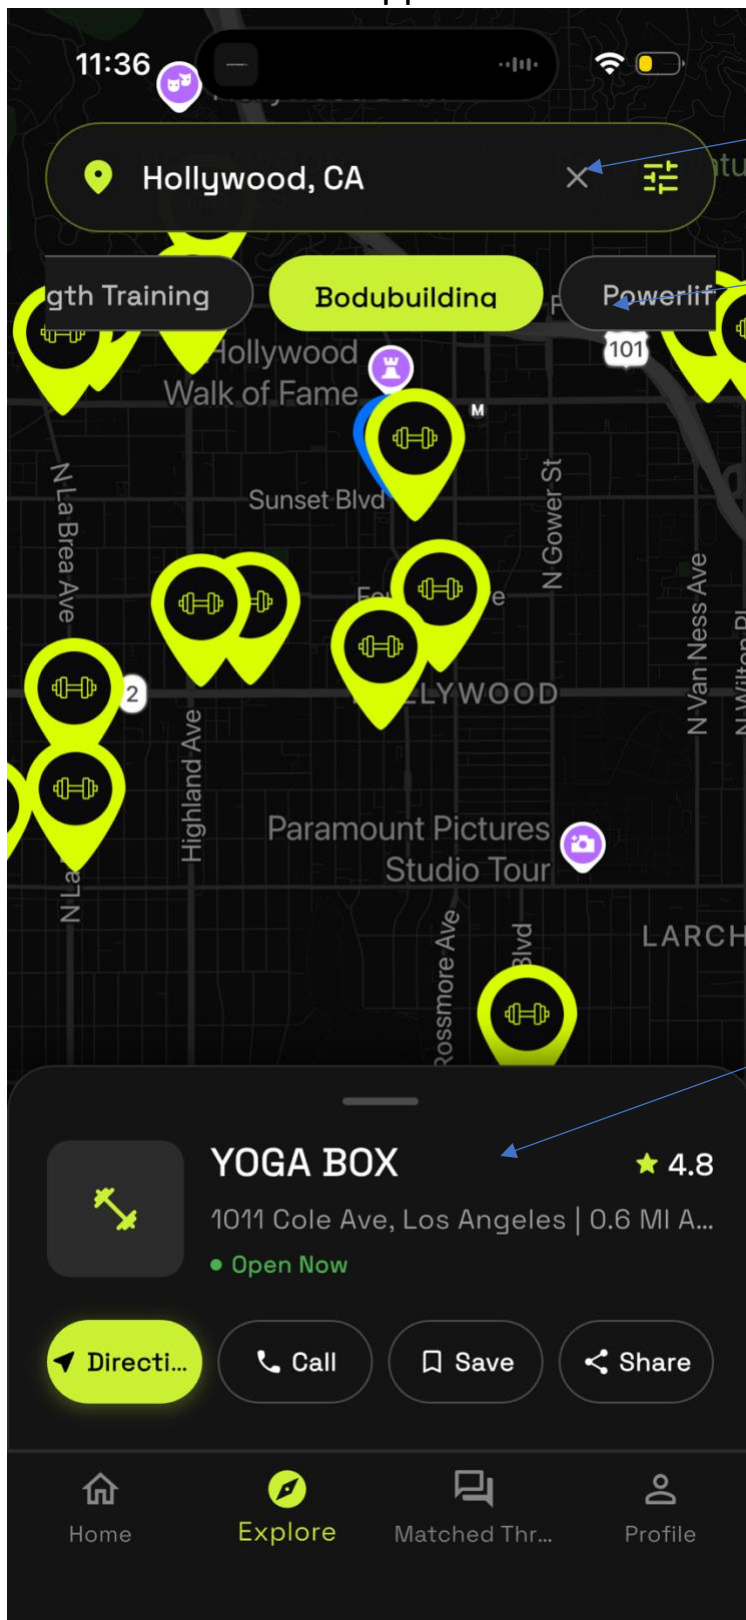

We may need to remove featured or make this a premium feature. We cant feature people for free or that will blow up our business model for revenue.

Notice that the actual Gym or fitness center that pops up doesn't match the actual exercise option chosen. From the filter I chose Hollywood / Personal Training and yoga popped up. I cant stress show crucial this is as users will kill us for incorrect info especially if its on the App. We get it right and we have LOYAL fans all over the world

Heres one more – it appears the filters are off

Bodybuilding is chosen but Yoga pops up as option
