

GYMatch - MVP Product Overview

GYMatch is a real-time location-based gym discovery and training partner platform that automatically detects a user's current location and instantly displays nearby gyms without requiring manual location input.

Beyond gym discovery, GYMatch introduces a lightweight social utility layer that allows users to find workout partners currently training at specific gym locations.

The platform is designed to bridge the gap between:

“I need a gym.”

and

“I’m training with a partner.”

The long-term vision is to build a scalable fitness ecosystem where gyms, trainers, and fitness communities connect through real-time location intelligence and social engagement.

Phase 1 Objective

The primary objective of Phase 1 is to build a polished MVP (Minimum Viable Product) that demonstrates:

- Real-time nearby gym discovery
- Lightweight social matching functionality
- User engagement through workout partner discovery
- Investor-ready product positioning
- Scalable monetization opportunities

The MVP will focus on creating a seamless experience where users can:

- Discover gyms nearby
- Find active workout partners (Dummy)
- Send training invitations
- Engage through lightweight social interaction

Phase 1 User Roles

For the MVP, only 3 core user roles are necessary.

1. Guest - A user who opens the app without creating an account. (default experience)

a. Permission

- i. Allow location access
- ii. Browse nearby gyms
- iii. View gyms on the map
- iv. Open gym details
- v. Search gyms
- vi. Apply filters
- vii. View directions

b. Guest-to-Member Conversion Strategy - If a guest user attempts to use the “Find Workout Partner” feature, the app will trigger a signup modal.

- i. **Example:** “Unlock the GYMatch community. Sign up to see who is training at this gym right now.”
- ii. **Gym detail pages may also display:** “32 people are currently looking for a workout partner here.” (Dummy Data)

2. Registered User - A user who signs up using:

a. Permission - Create and edit profile, Save favorite gyms

b. Purpose - Adds engagement and retention features.

c. Signup with - Email, Google

d. Features

- i. Activate “Find Workout Partner” mode
- ii. Create training preferences
- iii. View active gym partner feed (Dummy)
- iv. Send training invitations
- v. Accept/reject training requests
- vi. Participate in temporary training chats
- vii. Block/report users

3. Super Admin - The platform administrator manages the system, like Manage users and Manage categories

MOBILE APP SCREEN BREAKDOWN

1. **Splash Screen** - Brand introduction while the app initializes.
2. **Onboarding Screens (2-3 Screens)** - Quickly explain the app concept.
 - a. **Features**
 - i. Nearby gym discovery explanation
 - ii. Real-time location concept
 - iii. Benefits of the platform
 - iv. CTA buttons
3. **Location Permission Screen** - Request GPS/location access.
 - a. **Features**
 - i. Permission explanation
 - ii. "Allow Location Access"
 - iii. Fallback option
4. **Home Screen (Main Screen)** - Core app experience, MOST IMPORTANT screen.
 - a. **Features**
 - i. Nearby Gym Feed - Automatically shows gyms near the user.
 - ii. Dynamic Location Detection - If the user travels:
 1. UK → shows UK gyms
 2. USA → shows USA gyms
 - iii. Featured Gyms Section - Highlighted gyms.
 - iv. Search Bar - Quick search access.
 - v. Categories - Gym, CrossFit, Women Only, Yoga, MMA
 - vi. Quick Filters - Open now, Nearby, Top rated
5. **Map Screen** - Interactive map-based discovery.
 - a. **Features**
 - i. **Live Map** - Interactive map with gym markers.
 - ii. **Nearby Pins** - Shows nearby gyms visually.
 - iii. **Dynamic Radius Loading** - Updates based on user movement.
 - iv. **Tap Marker** - Open mini gym preview.
 - v. **Directions Button** - Open navigation apps.

6. **Gym Details Screen** - Detailed information about a gym.

a. **Features**

- i. **Gym Information** - Name, Address, Distance, Timings, Contact info
- ii. **Gallery** - Gym photos.
- iii. **Amenities** - Example: Parking, Cardio, Sauna, Personal training
- iv. **Action Buttons** - Call, Directions, Save, Share
- v. **Ratings** - Basic star rating display.

b. **Partner Feed Section** - Allow users to discover active workout partners currently available at that gym. (Dummy)

i. **Features**

- 1. "Find Workout Partner" toggle
- 2. Active user feed
- 3. Workout preferences display
- 4. Experience level display
- 5. Invite to Train button
- 6. Temporary active status
- 7. Sponsored/Spotlight trainer listings

ii. **Privacy Features**

- 1. No exact user location sharing
- 2. Users only appear as active within that gym
- 3. Block/report functionality

c. **Active Partner Widget**

- i. Example: "3 people are currently looking for a workout partner here."
- ii. Partner Feed Preview
- iii. Displays active users available for training.
- iv. Spotlight Trainers
- v. Promoted trainers are shown on the gym page.

7. **Search Screen** - Manual gym discovery.

a. **Features**

- i. **Search by Name** - Search gyms instantly.
- ii. **Suggested Searches** - Popular gyms/categories.
- iii. **Search History** - Recent searches.

8. **Filter Screen** - Improve search precision.

a. **Features**

- i. **Distance Filter** - 1km / 5km / 10km
- ii. **Rating Filter** - 4+ ratings, etc.
- iii. **Category Filter** - Gym, Yoga, MMA, CrossFit,
- iv. **Open Now Filter** - Real-time availability.

9. Favorites Screen - Allow users to save gyms.

a. **Features**

- i. **Saved Gyms List** - Quick access to favorite gyms.
- ii. **Recently Viewed** - History tracking.
- iii. Note: Access is available only to logged-in users.

10. Authentication Screens

a. **Includes**

- i. Login Screen
- ii. Signup Screen
- iii. Forgot Password Screen

b. **Features**

- i. **Authentication Methods** - Email, Google
- ii. **Guest Mode** - Continue without login.

11. User Profile Screen

a. **Features**

- i. **User Information** - Name, Email, Profile image
- ii. **Saved Gyms** - Quick access.
- iii. **Settings** - Preferences and permissions.
- iv. **Logout**

12. Training Thread Screen - Provide temporary lightweight chat functionality between matched users.

a. **Features**

- i. Temporary conversation thread
- ii. Invite acceptance flow
- iii. Training coordination
- iv. Safety tools

- v. Block/report button
- vi. Auto-expiring conversations

Note: This is intentionally lightweight and not a full social messaging system.

ADMIN PANEL (PHASE 1)

1. **Admin Login**
2. **Dashboard Overview** - Total gyms, Total users, Active users, Most viewed gyms
3. **Gym Management Screen**
 - a. **Features**
 - i. **Add Gym, Edit Gym, Delete Gym**
 - ii. **Manage:** Images, Address, Coordinates, Amenities, Categories
4. **User Management Screen**
 - a. **Features** - View Users, Suspend Users, Basic moderation
5. **Category Management** - Gym categories, Tags, Amenities

PHASE 1 CORE FEATURES EXPLAINED

1. **Real-Time Geolocation Engine** - Automatically detect user location.

a. **How It Works**

- i. **Step 1** - App requests GPS permission.
 - ii. **Step 2** - Mobile device returns coordinates.
 - iii. **Step 3** - Backend searches nearby gyms.
 - iv. **Step 4** - Gyms displayed instantly.
-

Why This Matters

This is the CORE differentiator. Without this feature, GYMatch loses its uniqueness.

2. **Nearby Gym Discovery Engine** - Find gyms near the user.

a. **How It Works**

- i. Backend uses: Latitude, Longitude, Radius queries
- ii. Then sorts results by: Distance, Popularity, Ratings

3. **Interactive Maps** - Visual exploration experience.

4. **Smart Search System** - Allow users to quickly discover gyms.

5. **Favorites System** - Increase retention and engagement.

6. **Workout Partner Matching System** - Allow users to find compatible workout partners currently active at a gym.

a. **How It Works**

- i. **Step 1** - User enables “Find Workout Partner” mode.
- ii. **Step 2** - The user appears in the active partner feed for that gym.
- iii. **Step 3** - Users are matched based on:
 1. Workout style
 2. Training preferences
 3. Experience level
- iv. **Step 4** - Users can send “Invite to Train” requests.

- v. **Step 5** - Accepted requests open a temporary training thread.

7. Notifications System - Re-engage users.

a. Example Notifications

- i. "A new gym opened near you."
- ii. "Top-rated gym nearby."
- iii. "Special promotion available"
- iv. "Alex accepted your training request."
- v. "5 people are currently looking for a workout partner nearby."
- vi. "A Spotlight Trainer is available at [Gym Name]."
